Kaustubh Dua

Software Engineering Student | Full-Stack & Applied AI | JIIT Noida | Class of 2029
kaustubhdua1991@gmail.com | github.com/kaustubhdua | linkedin.com/in/kaustubh-dua-2b5a76416 | kaustubhdua.vercel.app

PROFILE

Electronics & Computer Engineering undergraduate building full-stack software and applied AI/data tools. Seeking software engineering internships across backend, full-stack and applied AI; focused on usable interfaces, clear system boundaries and reliable testing.

EDUCATION

Jaypee Institute of Information Technology, Noida | B.Tech. Electronics & Computer Engineering (ECM) | Expected 2029

EXPERIENCE

Pinnacle Labs | Web Development Intern | 2026 | HTML5, CSS3, JavaScript, Fetch API, localStorage
- Built Weather Core Matrix, a responsive weather dashboard with asynchronous Fetch API updates.
- Built Nord Studio Task Manager with localStorage persistence, priority labels and All / Active / Completed filters.

github.com/kaustubhdua/weather-core-matrix | github.com/kaustubhdua/nord-studio-task-manager

SELECTED PROJECTS

NIRDHOOM | Multi-contributor prototype | React, Supabase, PostgreSQL/PostGIS, OR-Tools
- Contributed to a field-first workflow connecting farmer bookings, operator dispatch, evidence and residue-buyer pathways; hosted build uses sample data.

Saathi | Multi-contributor MVP | Next.js, FastAPI, Python
- Hindi/Hinglish assistant with deterministic intent routing, source provenance, consent prompts and human escalation; includes a 120-case synthetic benchmark.

PatchPilot | Personal early-stage project | Python, FastAPI, pytest, Docker
- Analyses PR diffs as untrusted text and emits evidence-backed risk signals and test suggestions; never executes repository code.

JIIT Youth Club Website | Multi-contributor campus website | React, Vite, Supabase, Playwright
- Built and iterated the public club website for events, societies, gallery, archive and recruitment; production deployment is not claimed as verified.

SKILLS

Languages: Python, TypeScript, JavaScript, C++17, Java, SQL | **Frontend:** React, Next.js, Vite, Tailwind CSS, Three.js/WebGL
Backend & Data: FastAPI, PostgreSQL/PostGIS, Supabase, SQLAlchemy, OR-Tools, scikit-learn, PyTorch | **Engineering:** Git, GitHub Actions, pytest, Playwright, Docker, CodeQL

LEADERSHIP & RECOGNITION

- **Nexus Spring of Code (NSoC)** | Campus Ambassador | 2026-Present; representing the open-source program at JIIT Noida.
- **JIIT Youth Club, Tech Vertical** | Member, Tech and Management team.
- **JPMorgan Chase & Co.** | Software Engineering Job Simulation (Forage, 2026); Java, Spring Boot, Kafka and REST integration.
- **Harvard CS50** | Introduction to Databases with SQL; seven problem sets and final project.
- **OSDHACK 26** | Certificate of Merit for participation; team-built Adapt AI, a hardware-aware local Ollama assistant.
- **ISRO Bharatiya Antariksh Hackathon 2026** | Participation with AkashChalak, a satellite-assisted air-quality prototype.
